

OS-7 A

Smart Amplifier with Touch Screen & Android OS

The OSL OS-7 A is a discreet wall mount amplifier with a touch screen control panel and an Android operating system. This amplifier offers great integration for home & commercial projects. With the built-in android OS, users can directly load music streaming apps onto the amplifier and play music directly from it. The 4 channel amplifier delivers 100W of power onto each channel at 4 ohms.
