

Go Meet

Wireless Mobile Interview System with
Active Noise Reduction

The OSL GO Meet is a mobile interview system allowing incredible ease & flexibility while recording podcasts, live streams or interviews on the go. Its mobile receiver fits into any camera, mobile phone or recording device for an easy wireless experience. The transmitters are cardioid, dynamic microphones and tuned to improve vocal range performance while actively filtering out background noise.

Technical Specifications

System Components	2 x OS H - Handheld Wireless Transmitters 1 x Go Meet Mobile Receiver 2 x Anti-roll Mic Clips Charging & Split Cable Test Rugged ABS Travel Case
Transmitter Type	Cardioid (Uni-Directional)
RF Range	10m, Line of Sight
RF Output	Max 10 mV
Active Filter	Active Background Noise Filtering
Modulation	Wideband FM
Diversity Principle	Non-Diversity

Receiver Dimensions

Height	66 mm
Width	99 mm
Depth	23 mm
Net Weight	800 g

Microphone Dimensions

Height	247 mm
Diameter	49 mm
Net Weight	800 g
